

# Module 8 – AI in the Field

Week 4 – September 22, 2025

# Plan for Today

- 1. Contextual Bandits**
- 2. Linear Bandits**
- 3. Skimming the LinUCB Paper**
- 4. Implementing LinUCB Properly**

# Vanilla Bandits

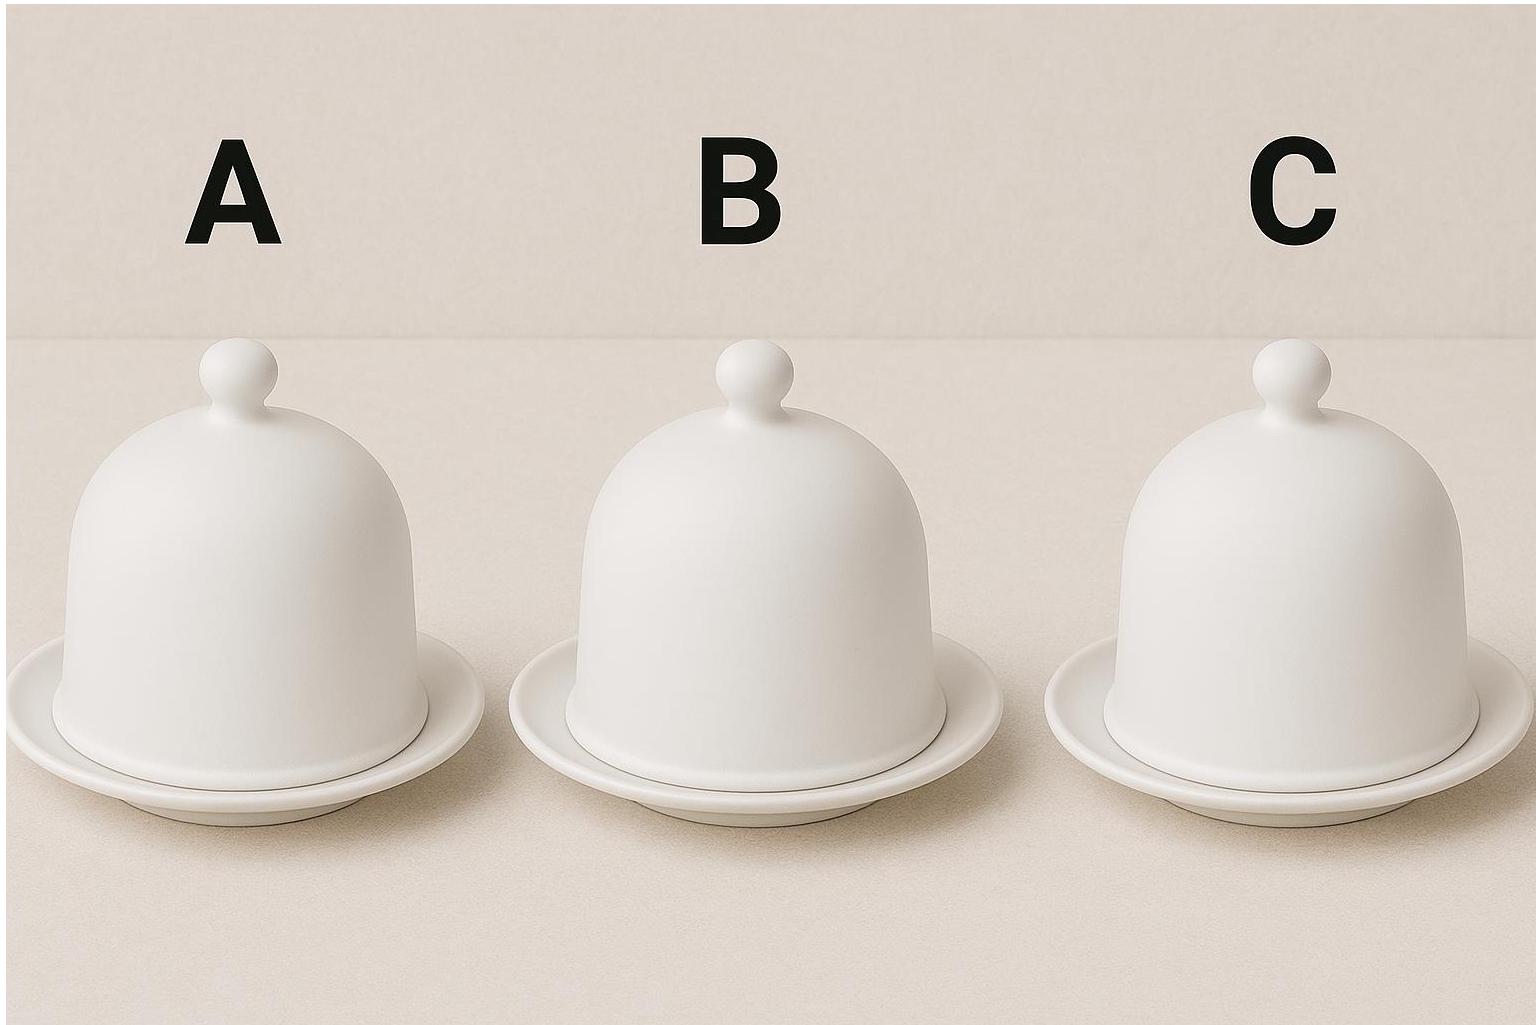

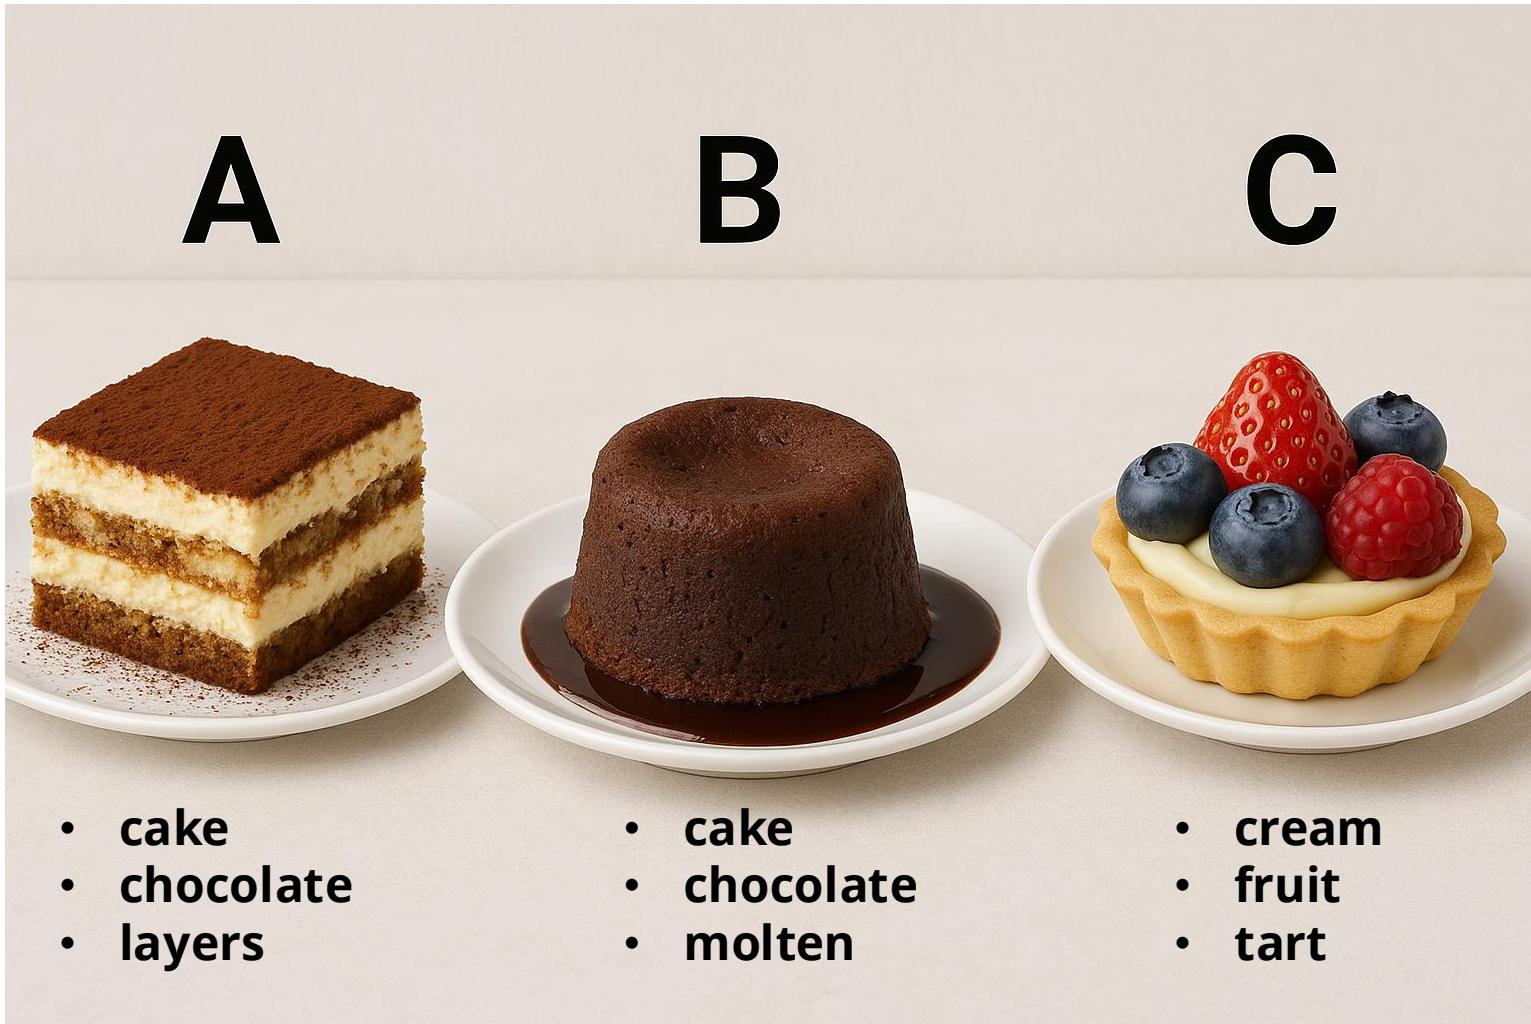

Image by ChatGPT

Faculty of Computing & Data Sciences

# Contextual Bandits

- cake
- chocolate
- layers

- cake
- chocolate
- molten

- cream
- fruit
- tart

Faculty of Computing & Data Sciences

# Context Sharing?

- 1. Do actions share context variables?**
  
- 2. Do actions share models?**
  
- 3. Do actions repeat between rounds?**

# Dish Context?

1. Cake?
2. Chocolate?
3. Cream?
4. Fruit?
5. Layers?
6. Tart?

Faculty of Computing & Data Sciences

# User Context?

- 1. Chocoholic?**
- 2. Sweet tooth?**
- 3. Vegetarian?**

- A. Avid reader**
- B. Foodie**
- C. K-pop fan**

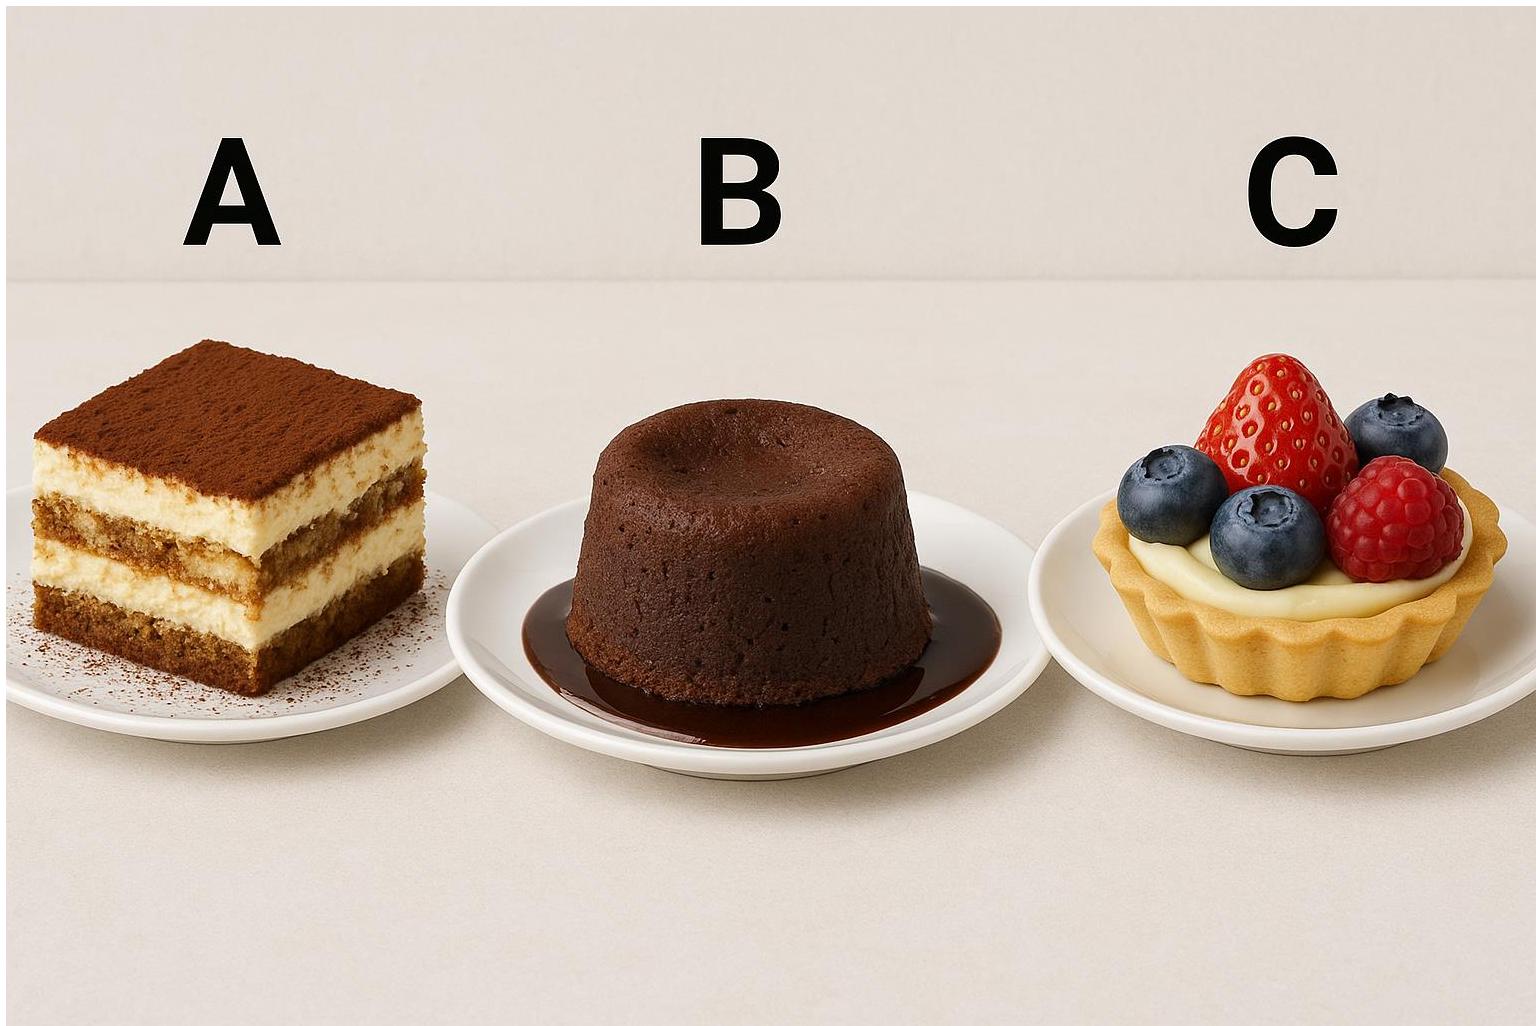

Image by ChatGPT

Faculty of Computing & Data Sciences

# Media Context?

1. Action
2. Animated
3. Band
4. Demon
5. K pop
6. Romance
7. Self-discovery

Image via Wikipedia

# Model per Movie

**Given the context from this viewer,  
what is the probability that they will  
enjoy this movie?**

- Model of movie's appeal
- Input to model from movie's viewers

Image via Wikipedia

Faculty of Computing & Data Sciences

# Model per User

**Given the context from this movie,  
what is the probability that I will  
enjoy it?**

- Model of my preferences
- Input to model from movie's context

Image via Wikipedia

Faculty of Computing & Data Sciences

# Why not Both?

**Given the context from this movie  
and viewer, what is the probability  
that the viewer will enjoy the movie?**

- Model of general movie preferences
- Input to model from movie and viewer's context
